APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 18014 is issued subject to the terms and conditions imposed in said Permit 18014 and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit is issued subject to existing rights and is further subject to revocation if and when water can be furnished by an entity such as a water district or a municipality engaged in furnishing water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. It is understood that this right must allow for a reasonable lowering of the static water level. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 543.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under this permit and Permits 45427 and 45556 shall not exceed 635.0 acre-feet per year.

This corrected permit is issued to indicate that this permit changes the point of diversion of all not a portion of the waters granted under Permit 18014.

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.3 cubic feet per second, but not to exceed a yearly duty of 5.0 acre-feet per acre of land irrigated from any and/or all sources, and not to exceed 217.2 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before December 28, 1983

Proof of completion of work shall be filed before January 28, 1984

Application of water to beneficial use shall be made on or before December 28, 1984

Proof of the application of water to beneficial use shall be filed on or before January 28, 1985

Map in support of proof of beneficial use shall be filed on or before January 28, 1985
